

FIFTY PEOPLE HURT

Three Electric Cars in Collision Near Peoria, Illinois, This Morning

Ugly Freight Wreck On Nickel Plate Near Findlay, O.

Four Tracks Blocked by Collision on the Pennsy

One Engine and Fifteen Cars Wrecked--One Killed and Several Badly Injured This Morning Near Allegrippus, Pennsylvania.

Peoria, Ills., Feb. 25.—In a dense fog this morning a collision involving three electric cars occurred at South Bartonville, five miles below here on Peoria and Pekin terminal line. Loaded with laborers from Peoria going to work at Pekin was run into by another car loaded with employees from Pekin and while the confusion incident to the collision was at its height another loaded car from Peoria ran into the mass. More than fifty people were injured, three of them fatally and five severely. Those fatally injured are:

Danied White, motorman, both legs taken off.
Harry Roberts, conductor, both legs and skull crushed.
Edward Bloom, laborer, left foot taken off, right leg crushed and several ribs broken.

NICKEL PLATE WRECK.

Findlay, O., Feb. 25.—In a freight wreck on the Nickel Plate railroad at Arcadia, 7 miles east of Findlay this morning, J. E. Hepnar of Fort Wayne, the head-brakeman was instantly killed. The train went off the track at the L. E. & W. crossing and piled up six or seven box cars. The engineer and firemen remained at their posts and were not injured.

had stopped or was running slowly has not yet been ascertained. One mile east of Allegrippus on the down grade, engine No. 2906 was making good time when all at once the rear lights of the train ahead loomed up before Engineer Cooney. Brakes were applied in an instant, and the men on the engine made a plunge from the cab. A second later the crash came. The huge locomotive plowed into the caboose and rear cars of the front train, reducing the engine to a mass of broken and twisted iron and piling shattered cars and merchandise over the tracks. Fifteen cars were broken by the collision.

J. A. Cox was the flagman on the front train. When he saw the flashing headlight of the rear engine bearing down on his train he jumped to avoid the crash. He cleared the wreck but was killed by the fall. Engineer Cooney stuck to his engine and was pinned in the wreck. Conductor Leach and Fireman Storey both jumped from the engine and were seriously hurt. The wrecking engine and cars covered the four main tracks, completely blocking traffic.

The victims are:

Killed:
J. A. Cox, 39 years old, flagman, unmarried, and lived at Johnstown.
Fatally injured:
R. E. Cooney, 22 years old, engineer, lived at Conemaugh; taken to the Altoona Hospital.

Injured:
C. W. Leach, 39 years old, conductor married and living at Conemaugh, badly cut and bruised.

H. M. Story, 30 years old, fireman, single, lives at Conemaugh, badly cut and bruised.

An extra freight train east bound, was being hauled by engine No. 1102. It was being followed closely by another extra freight hauled by engine No. 2906. The latter train was in charge of Engineer Cooney and Conductor Leach. Whether the first train

had stopped or was running slowly has not yet been ascertained. One mile east of Allegrippus on the down grade, engine No. 2906 was making good time when all at once the rear lights of the train ahead loomed up before Engineer Cooney. Brakes were applied in an instant, and the men on the engine made a plunge from the cab. A second later the crash came. BATTLE

In Which Three Hundred People are Reported Killed.

London, Feb. 25.—The Salonika correspondent of Reuter's News agency today reports that an encounter between Bulgarians and Turks occurred at Radoviste on February 16. The Bulgarians were badly beaten, losing seven people killed, including their leader, Yovanoff. The Turkish casualties are reported to have been 300.

NO POLITICS

FOR ORGANIZED LABOR IN COLUMBUS AS A BODY.

No Separate Labor Ticket or Endorsement of Mayorality Candidates—Representative McNamee.

Columbus, Feb. 25.—According to the terms of a set of resolutions adopted at the meeting of the Columbus Trades and Labor assembly, at its meeting Monday evening, no more politicians need expect the endorsement of that body for office, and a resolution sanctioned some time ago by the body, to the effect that all candidates carrying working cards in any recognized union will receive its support, is null and void.

The hot time predicted for the meeting came, and for almost two hours there was a continuous discussion upon the proposition to declare before the public, and through the public press, that no candidate for mayor had received the endorsement, either by inference, or otherwise of the assembly.

The meeting was declared "a political gathering," pure and simple, by some of the delegates, who also predicted that unless politics are eliminated from the assembly that organization will soon go to pieces.

The resolutions in question were evidently prompted by the publication in the last issue of the assembly's organ of an article in which one of the candidates for mayor was supported as a representative of organized labor, and a number of delegates said the publication looked to them, by inference, as if the assembly had endorsed that candidate.

The resolutions declaring against the endorsement of any candidate for mayor by the Trades and Labor Assembly as a body were adopted unanimously.

All previous efforts to have the Trades and Labor Assembly enter the political field and nominate a separate labor ticket, having signally failed, the resolutions declaring against endorsing any candidate for Mayor settles the matter without question that organized labor in Columbus cannot be dragged into politics as an organized body.

REPRESENTATIVE MCNAMEE.

Columbus, Feb. 25.—The news from Newark that Representative John McNamee had been advertised to make a speech at a labor meeting in that city, caused some comment here in both political and labor circles. It is not known here how the announcement came to be made, but it is well understood why Mr. McNamee did not go to Newark to speak at the meeting. He would have made the boys a good Democratic speech had he been present, urging them not to throw away their efforts on any separate labor ticket, but to stand by labor's best interests by voting the straight Democratic ticket.

ANNOUNCED WITHOUT AUTHORITY.

Columbus, Feb. 25.—Hon. John H. McNamee, who was billed to make a speech before a Newark audience Monday evening, was seen today by a reporter and offered a vigorous denial that he had authorized any one to announce him as a speaker in behalf of the so-called labor ticket running in that city. Mr. McNamee said he had received an invitation from Smith and Davidson asking him to come to Newark, but he had made no reply to it and no notion of going. He believed the Democratic party was the natural home of the working man and that he could be relied on to solve all of the problems of labor.

WIFE

Died Suddenly In Germany

Certificate For \$3,000 Claimed by Sister

OHIO WOMAN'S STRANGE FATE IN OLD COUNTRY

RECALLED BY SUIT IN COURT

Story of Intrigue and Crime in Foreign Country Comes to Light at Galion, O.

Galion, O., Feb. 25.—A story of intrigue and crime committed in a foreign country has just come to light through proceedings commenced in Common Pleas Court of Crawford county. Letters rogatory were granted in the case commenced by W. F. Mueller, administrator of the estate of Marie Mueller, deceased, against the Galion National Bank. Through the proceedings the story surrounding the death of Marie Mueller is disclosed.

For nearly 30 years there lived in this city a German citizen of the name of W. F. Mueller and his wife, Marie Mueller. They had no children. He was a contractor and by great industry had succeeded in amassing a comfortable fortune, being rated as one of the wealthiest citizens of Galion.

About seven years ago he and his wife quarreled. She charged him with neglect of marital duties, and applied for divorce and alimony. But before the case was called for hearing the parties agreed to separate. She released all interest in his property and in return he gave her money and personally valued at about \$4,000.

A month or so later she sailed for Stuttgart, Germany, the place of her nativity. Among her possessions was a certificate of deposit for \$3,000 on the Galion National Bank.

In the course of a few months Mr. Mueller learned that his wife died suddenly shortly after her arrival at Stuttgart. Knowing that she had made a will before leaving Galion and that he was named as sole beneficiary he at once left for Germany to take charge of his wife's estate.

Upon his arrival he was greatly surprised to learn that his wife's sister had obtained possession of the certificate for \$3,000 and had it cashed at the Stuttgart bank.

He began an investigation and learned it is alleged that his wife's sister represented to the bank that she was Marie Mueller, the person named in the certificate, and that in this claim she was supported by her brother. Further he learned that the Galion bank had remitted to the Stuttgart bank and that the sudden death of Marie Mueller was enshrouded in mystery. Mr. Mueller acted promptly and secured the arrest and conviction of the alleged conspirators. The jurors, however, recommended mercy, and the Court imposed a slight penalty.

Mr. Mueller then returned to this city and began suit against the Galion National Bank for the recovery of the \$3,000. Shortly afterward he removed to Denver, Colo., where he was again married, and where he died about a year ago. The case was revived, however, by the appointment of R. W. Johnston, of this city, as administrator de bonis non, with the will annexed, and will likely be tried some time during the present term of Court.

Stole an Engine.

Lebanon, Mo., Feb. 25.—While Engineer Omelia and his fireman, of the engine No. 452, were taking a lunch here this morning four men stole the engine, ran it seven miles west and abandoned it with the supposed purpose of wrecking an eastbound passenger. A telegram to Conway stopped the passenger train and the sheriff and a posse were soon in pursuit of the thieves.

U. S. Marshal McAlister arrested George McGillicuddy at Crooksville and took him to Zanesville on the charge of contributing 50 cent pieces at East.

PLOT

Involving All Crowned Heads of Europe It's Said.

New York, Feb. 25.—Central office men and steamship detectives are investigating today a story which, if true, reveals an anarchist plot, involving the crowned heads of Europe. A statement has been made by an Italian anarchist here that a great secret international convention is to be held in Paris on or about March 25, when plans will be devised and lots drawn for the extermination of the rulers of Europe. Five delegates of the "Reds" to represent this country, are in the city, it is said, preparing to sail on one of the steamships tomorrow.

MURDER

The Charge Knapp Must Answer--Has Had Four Wives.

Indianapolis, Ind., Feb. 25.—Albert Knapp of Hamilton, Ohio, formerly of Indianapolis, was routed from bed at the home of his bride, formerly Anna May Gamble, 639 Indiana avenue, this morning by the police and taken to Hamilton to answer to the charge of murder. If statements of the police are true, it will be shown that Anna May Gamble is the last of his four wives. Knapp, although only 41 years old, has had four wives, and the Hamilton police believe he murdered at least two of them. Mrs. Knapp No. 4 became the wife of the prisoner two weeks ago. Knapp must explain what became of two of his wives, who mysteriously disappeared.

Honolulu, Feb. 25.—A terrific hurricane swept over the Samoa Islands on the 12th instant. Heavy damages were done, particularly on the island of Tutuila.

VERMILLION TALKS

Detectives at Indianapolis Inclined to Accept Newark Man's Claim That He is Victim of Conspiracy.

Indianapolis, Feb. 25.—William H. Vermillion, awaiting a preliminary hearing on charge of having attempted to kill his wife and children by giving them poisoned candy, talked yesterday for the first time of his trouble with his wife, and confirmed the Advocate's article of Monday, saying that the mischief is due to an unnatural love which he alleges that his wife shares with her half brother, Edward Elliott. He claims that his only mission to the Elliott home was an effort to rescue his children.

Both Vermillion and his wife are fairly good looking people. Vermillion will be given a hearing on Thursday. The detectives are still much puzzled over the case, but are inclined to accept Vermillion's theory that he is the victim of a conspiracy.

MUCH MAIL BURNED

It is Now Known That Eight Instead of Six Men Were Killed in the Big Four Wreck Near Berea, Ohio.

Cleveland, O., Feb. 25.—It is now known that eight instead of six men were cremated in the Big Four wreck near Berea. Four of the victims were named in the Advocate yesterday. (Jump, quick for your life.) Meaning, I had put on the brakes and were dug from the debris, but it is impossible to identify them. Two of them are believed to be tramps who were stealing a ride on the freight train.

The destruction of all the mail in the wrecked postal car will create a commotion among business houses. The train carries the largest amount of mail that goes out of Cleveland on any of the night runs. It carries all of the afternoon mail from Cleveland to Columbus, Cincinnati and for the southern connections, besides a large amount from eastern connections. Much of this mail is from banks and wholesale houses, and it is usually filled with commercial paper.

Engineer Ferguson, when seen at his home, described the wreck as follows: "We had nearly reached the main line when I saw a glaring light in front of us. I called to Fireman Miller, 'For God's sake, that at Berea. Four of the victims were named in the Advocate yesterday. (Jump, quick for your life.) Meaning, I had put on the brakes and were dug from the debris, but it is impossible to identify them. Two of them are believed to be tramps who were stealing a ride on the freight train.

RIOTERS AND DEPUTIES

Engage in a Desperate Battle in Which It Is This Afternoon Reported That Eight Men Were Killed.

CHARLESTON, W. Va., Feb. 25.—About two hundred striking miners at Wright, Raleigh county, where Deputy U. S. Marshal Cunningham was killed last Saturday, yesterday afternoon broke down the railroad bridge, the property of the Chesapeake & Ohio railroad company, and committed other depredations on the property of the railroad and coal operators. Last night Cunningham and 35 deputies went to the scene of depredation to arrest the marauders. Cunningham and his deputies were fired on by the rioters. A battle ensued in which one of the posse and ten rioters were killed. (Continued on page six, fifth column.)

RYAN SUIT DISMISSED

On Plea That No Money Intrusted for Gambling Purposes Can be Recovered by the Loser--St. Louis Decision.

St. Louis, Feb. 25.—By setting up the plea that the turf investment companies were simply gambling schemes, and all depositors, or rather partners, in the business must have known the nature of the business, Charles T. Noland, attorney for John J. Ryan, secured an instant dismissal Tuesday of the first of the many attachment suits filed against the investment companies.

This is regarded as the defense that all of the "get-rich-quick" concerns will make in the many attachment proceedings now pending. The suit was brought Monday night when the first intimation of the crash

was made known and Miss Mabel Quinn, niece of Constable E. E. Guion of Justice Kleiber's court, 1169 Choctaw avenue, was the plaintiff, seeking to recover money invested a week before.

The case was called before Justice Kleiber Tuesday, and was dismissed as soon as the attorney for the defendant announced his grounds of defense.

E. E. Guion, who was really the plaintiff in the suit, said they had no chance of overcoming the statute forbidding the recovery of money loaned for gambling or used for gambling with the consent of the person loaning the money.

CONDENSED

C. M. Schwab gave a blind newsboy \$5 last year for a paper. The lad gave a lawyer the money as a retainer to begin suit against W. J. Jungling, Sr., who in 1889 handed him a bottle of ammonia calling it cologne. The boy then, Anzus became instantly blind as the fluid entered his eyes. He has just recovered judgment in New York against Jungling for \$6000.

The Canton Board of Trade's annual banquet last night was attended by over 200. Addresses were followed by a vaudeville program.

Chas. Carter, 35, a freight conductor of London, O., was killed and Arthur Hershefer, brakeman, of Columbus, was fatally hurt at Middletown Junction today. The men were caught between two cars.

DEMOCRATIC PRESIDENTIAL
TIMBER.

The New York World devotes considerable space to discussing Democratic timber for the Presidency. But it does not seem to realize that Grover Cleveland is an absolute impossibility. Cleveland will not be named in the National convention, any more than Mr. Bryan, after his two unsuccessful candidacies. It is not unlikely that both Cleveland and Bryan, through their friends and advisers, will have a great influence on the choice of the National convention, but after all the choice will be made by two thousand delegates elected from all parts of the country, and who will understand the question as it presents itself in the summer of 1904. The World notes that the man most generally favored is Chief Justice Parker, of New York, and suggests strong reasons for his nomination on the score of availability and great capacity for the highest office. "To the objection that Judge Parker is not sufficiently well known to the country," the World says, "it is perhaps enough to say that the occupant of the highest court of the greatest state is not an inconspicuous figure. Judge Parker is nearly as well known to the country as Grover Cleveland was in 1884, or as some of the earlier Presidents were before they were nominated to that office." For instance, Polk in 1844, who defeated Henry Clay, and Franklin Pierce in 1852, who defeated Winfield Scott.

Today's rebus represents another prominent business house. Which one is it?

JACKSONTOWN.

A Junior Epworth League of the M. E. Church was organized Sunday evening, the following officers being elected:

President, Georgia Osborn.
First Vice Pres., Grace Gray.
Second Vice Pres., Verna Miller.
Third Vice Pres., Allan Crow.
Fourth Vice Pres., Willie McFarland.

Secretary, Ethel Swartz.
Treasurer, Katie Irwin.

Oliver Courson and wife took dinner with Mr. Frank Griffith and wife Sunday.

Mr. Charles Lynette and son Clem. spent Monday with her grandmother, Mrs. Mary Caughenbaugh.

Mrs. Frank Davis and Mrs. O. Courson were in Hebron Friday, the guests of Mrs. Kate Davis.

Mrs. J. E. House and son William, visited with Mr. and Mrs. Marion Bumcrat Saturday.

Mr. Kate Osborn and Mrs. Joseph Tavenor were Newark visitors Saturday.

Mrs. Lewis Swartz of Newark, spent the first of the week with her parents, Mr. and Mrs. Thomas Catlin.

Mrs. J. W. Etnier and Mrs. Cora Rogers were in Kkersville Monday, the guests of the former's daughter, Mrs. Bert Lemley.

Mr. John Guiridge of Newark, is spending several days with his daughter, Mrs. Thomas Holtsberry.

Mr. Robert Richter of Linnell, was in our village Monday on business.

Mrs. A. B. Gray and Mrs. Kate Osborn, the parsonage trustees of the M. E. church from this place, were in Hebron Tuesday, where they met with the other trustees to see about selling the parsonage, which is at present located in Hebron.

Mrs. Coryell and Miss Laura Fullerton were out sleigh riding Sunday, when their sleigh overturned, throwing them out and spraining Miss Fullerton's ankle.

CALL

FOR MEETING OF DEMOCRATIC
EXECUTIVE COMMITTEE

At the Office of 'Squire Andrew J. Crilly on Next Thursday Evening, February 26th.

A meeting of the Democratic City Executive Committee and all persons who expect to be candidates at the coming Democratic primary election, will be held in the office of 'Squire A. J. Crilly on Thursday evening, February 26. It is important that all the members of the committee attend this meeting.

Democratic City Executive Committee.

- First Ward—Frank Kessler.
- Second ward—Thomas Bucey.
- Third ward, N. P.—Jasper Keeckley.
- Third ward, S. P.—Daniel Gormley.
- Fourth ward, N. P.—Jehiel Tedrick.
- Fourth ward, S. P.—Joseph Stasel.
- Fifth ward, N. P.—Chas. Bader.
- Fifth ward, S. P.—Wm. Linke.
- Sixth ward—Frank Bolton.
- Seventh ward—Joseph Moser.
- Eighth ward—Jacob Farmer and A. J. Crilly.

A. J. CRILLY, Chairman.
J. M. FARMER, Secretary.

ONE WAY RATES

To many points in the states of California, Oregon and Washington.

EVERY DAY

The Union Pacific will sell One-way Colonist Tickets at the following rates from Missouri river terminals:

- \$25.00 to San Francisco, Los Angeles and many other California points. Tickets on sale Feb. 15 to June 15, 1903.
- \$20 to Ogden and Salt Lake City.
- \$20 to Butte, Anaconda and Helena.
- \$22.50 to Spokane and Waukegan, Wash.
- \$25 to Everett, Fairhaven and New Whatcom, via Huntington and Spokane.
- \$25.00 to Portland, Tacoma and Seattle.
- \$25.00 to Ashland, Roseburg, Eugene, Albany and Salem, via Portland.

Tickets on sale Feb. 15 to April 30, 1903.

PURITY.

The Concord Literary society held its last meeting for this season, Thursday evening, February 12. A very interesting program was rendered after which the meeting was given into the hands of the P. of I., who finished the evening with a box social. Music was furnished by John Braden, Dave Davis and G. W. Marriott. The net proceeds of the social were \$6.60, and an enjoyable time was had by all present.

John Hughes who was seriously ill last week with heart trouble is much improved now.

Rev. Thompson filled his regular appointment at Eden last Sunday and continued the services till Thursday night, when Luna Hathaway McCreary gave an exhibition of her elocutionary powers. An admission fee of ten and 15 cents was charged on this evening and the amount received was \$8.

Mrs. G. W. Marriott and Mrs. Anna Lovell visited friends in Martinsburg Saturday.

J. C. Larason of St. Louisville, visited his parents near here over Sunday.

Eugene Bodle expects to go to South Dakota some time in the near future.

Why doesn't somebody run for assessor in Eden township?

S. B. Larason visited friends in St. Louisville Sunday evening.

Mrs. Florence Marriott and son Willard are visiting her parents, Mr. and Mrs. James Neighbarger.

Although the weather man, like his prototype, the groundhog, sometimes errs in prognostics, his claim that \$4,000,000 of perishable freight was saved by his signals announcing the approach of the recent cold wave is not unfounded.

Mr. Robert Richter of Linnell, was in our village Monday on business.

Mrs. A. B. Gray and Mrs. Kate Osborn, the parsonage trustees of the M. E. church from this place, were in Hebron Tuesday, where they met with the other trustees to see about selling the parsonage, which is at present located in Hebron.

Mrs. Coryell and Miss Laura Fullerton were out sleigh riding Sunday, when their sleigh overturned, throwing them out and spraining Miss Fullerton's ankle.

EVENING GOWNS.

The Color Is Left to the Taste of the Individual.

There is something very smart about a cloth evening frock, and a recent model in a bright shade of sapphire blue seemed to be cut princess, the draping caught up to one side with some Greek embroidery. The low square decollete and elbow sleeves were finished with tuckers of lace. It is a curious fact that there is no rule about color at all. A dark brown

WHITE NET EVENING GOWN.

tulle frock is often the most successful in the ballroom, and so sometimes is a bright shade of navy blue. Some women look best in dull colors, which seem to enhance the brilliancy of their own coloring, while again others look their best in a distinctly bizarre style of dress. This is a matter in which one must use individual judgment unless one can afford to trust to the hands of the best costumers.

The picture shows a white net evening gown. JUDIC CHOLLET.

EARLY SPRING FASHIONS.

Picture Hats of Tulle and Chiffon.

Floral wreaths are less in evidence for evening wear than at the commencement of the season.

Mittens of real lace or of the finest silk net, either black or ivory, are increasingly fashionable, but they are only permissible for dinner or theater wear. For dances gloves reaching above the elbow are correct.

Entire picture hats of jet mounted on billowy folds of chiffon are worn, and tulle will come in again very shortly.

A favorite demitote is of cream crepe de chine trimmed with chantilly

VISITING DRESS OF MASTIC CLOTH.

lace or an entire simple frock of white chiffon with no decoration beyond a jabot of cream lace worn in company with a big black hat.

Hats, however quiet they may be, for morning wear are always of the smart shapes of pale felt trimmed with black, or white plumage or little sailors of moire trimmed with heavy lace.

The cut shows a visiting toilet or pale mastic cloth.

JUDIC CHOLLET.

The Winner.

"I played an interesting game of cards with Helen last night."

"What kind of a hand did you hold?"

BATTLES WITH SNOW

HARD FIGHTING FOR RAILROAD MEN IN THE ROCKIES.

Rotary Snowplows and the Men Who Run Them—Buckling Through the Monster Drifts That Pack the Mountain Passes.

Every western railroad is equipped with a large force of snow fighters. Rotary snowplows and men who know how to run them can cut their way through drifts that in the early days of western railroad building would have resulted in complete blockades. The rotary snowplow is one of the marvels of the railroad of today, and it is a liberal education in the art of snow fighting to see one of them eating its way through a white drift that threatens to cut off communication between the east and the west. There are several passes in the Rocky mountains which for six months in the year or more form a constant menace to train crews. These passes are situated at the top of the Great Divide, where the elements have full sway. Boreas pass, in Colorado, is a fair example. The snow begins falling at Boreas late in August or early in September, and it does not cease until well into May and sometimes June. There will be intermittent snowstorms in the midsummer months, but these are trifling affairs and are not to be mentioned in the same breath with the tremendous snowfalls of January and February. Few men make their homes at Boreas. It is nothing for them to get up in the morning and find themselves completely buried in snow. The one store is usually at the end of a tunnel cut through an immense snowdrift. The population of Boreas during these snowy months consists, for the most part, of the railroad men who are engaged in the strenuous work of fighting constantly changing drifts. Snow at Boreas does not talk; it rages. It is blown about in swirls and eddies and is forever forming new drifts as treacherously as a river that is constantly shifting the sand banks of its mouth. These drifts are not little affairs that will barely cover a "stake and rider" fence. They are piled ten, twenty and thirty feet high, and they spring up in a night.

To the "tenderfoot" it would seem impossible to plow a way through these drifts at Boreas, but when a huge rotary snowplow comes whirling up the track with three or four engines pushing vigorously behind it the "tenderfoot" reserves his decision. He is still inclined to favor the snowdrift, but he prefers to await developments before committing himself. With a rush and a plunge the big rotary is hurled into the white mass of snow. Black smoke pours from the engines, and the huge blades of the snowplow eat relentlessly into the drift. The snow shoots out of the office at the side of the plow, forming a huge, white semicircle constantly moving forward. One can keep track of its progress of the plow by following the advance of this rainbow of snow. Foot by foot the rotary eats its way forward, and finally it and the engines are buried in a huge trench of white. Only the stacks of the engines can be seen, bearing their blackness on the virgin garb about them. But the great white semicircle never fails to go forward until finally the "tenderfoot" knows that the drift is being conquered. When the regular overland limited comes along a few hours later, the passengers do not know of the battle that has just been fought. They travel through a canyon of snow as they pass Boreas, but they have no idea of the tremendous force required to cut this white path over the ridge of the continent; so they go on, all unconscious in their Pullmans, while the railroad men at the next siding ahead oil the rotary and gird up their loins for the next battle, which they know Boreas will be prepared to give them in a few hours.

The experiences at Boreas pass during a hard winter are duplicated at many other railroad passes in the Rocky mountains, to say nothing of great stretches at lower altitudes which have always been the favored haunts of snowdrifts and which have always given railroad men great trouble. It is the unexpected element at these points that brings a serious aspect to the situation. At the passes over the Great Divide railroad men are prepared for trouble, and consequently serious blockades are few, but when word comes that a train has failed to fight its way through the drifts 100 or perhaps 200 miles from the nearest available rotary plow there is consternation. To get a rotary plow to the blocked train takes time, and in the meantime the drifts are accumulating on the unused road, and each hour brings new menaces to railroad men and passengers alike.

Sometimes even the rotary plow has been known to be caught in a snow blockade. One instance occurred in Wyoming. An engineer who had a rotary plow on hand and who was making good progress during a three snowstorm was compelled to run back a few miles for water. Instead of taking the rotary with him he uncoupled and ran his engine back, and in the meantime the snow gathered so fast over the track that he was unable to fight his way back to the plow. Such instances are rare, however, and are only owing to the excess of snow and the narrowness of the tracks.

In playing the game it is found that the rubber ring slides over a smooth floor quite as easily and rapidly as a hockey puck glides on the ice, so that great activity on the part of the players is necessary, and there is abundant opportunity for team work. In case two opposing players thrust their sticks through the ring, so that it cannot be advanced in either direction, it is said to be held and is faced off again at that point in a manner similar to that in which a held ball is placed in

Invention of Dr. J. M. Voorhees, Physical Director of Pratt Institute in Brooklyn, Combines Many Elements That Are Conducive to Popularity—Simple Implements Used.

In the Pratt Institute gymnasium, in Brooklyn, the other night was given the first public demonstration of a new game, invented by Dr. J. M. Voorhees, physical director of the institute, and called ring hockey, says the New York Times.

In general the new game is an adaptation of ice hockey to indoor playing, with the addition of one or two features borrowed from basket ball, such as giving the opposing side a try for goal when one of its team is fouled and the passing of the ring back into play when it goes out of bounds. The game may be played in a gymnasium or any other large room having a smooth and unobstructed floor surface. The implements used are cheap and simple and can be improvised very readily from household materials when necessary, so that all circumstances combine to make a wide popularity for the game.

The floor space may be of any size, though, according to the rules as drawn up by Dr. Voorhees, it must not exceed 3,000 square feet of playing surface. It is divided through the middle by a transverse center line, and each half is again divided into two equal parts by a transverse quarter line. In beginning play the ring is placed on the center line, while trials for penalty goals are made from the quarter line.

The ring, which is the characteristic implement of the game and from which it takes its name, is a flat disk of flexible rubber an inch thick and five inches in diameter, having a central opening three inches in diameter. The edges of the opening are slightly beveled. The sticks used are the ordinary gymnasium wands, about three feet in length, varying according to the height of the player, from thirty-six to forty inches. They are one inch in diameter and have rounded ends.

Each goal consists of a pair of posts three feet high placed three feet apart, but a net or cage would be much better and probably will be substituted. In case the playing space is very small two uprights could be placed against the walls or even vertical lines drawn to represent goals. As the sticks can be made very easily and cheaply or can be improvised from broomsticks in case of need, the rubber ring will be the only part of the equipment which it would be absolutely necessary to purchase.

The sides consist of six men each, as follows: The goal, who plays between the goal posts; the quarter, who plays from the quarter line and aids in the defense of the goal; the center, who puts the ring in play, and two forwards, right and left. These three play from the center.

The ring is put in play on the center line, the two centers standing on either side of the line, with their sticks held to the floor on either side of the ring. The forwards six feet or more behind the center line, the quarters on their respective quarter lines and the goal tenders at their respective goals. At the signal the centers thrust at the ring, each endeavoring to secure it and to pass it to his sides, the forwards rush forward, and play becomes general.

The object of the game is to slide the ring between the goal posts, and this must be done with the stick alone. None but the goal tender may use his feet, and the use of the hands in any manner apart from the stick is forbidden. No tackling, holding or tripping is allowed, and blocking by the body is permitted only when the invading player first touches the ring with his stick. A violation of these rules or rough play of any kind constitutes a foul, the penalty for which is a trial for goal by the opposing side from the quarter line. The goal if scored counts one-half a point, while a goal scored in the regular way counts one point.

In playing the game it is found that the rubber ring slides over a smooth floor quite as easily and rapidly as a hockey puck glides on the ice, so that great activity on the part of the players is necessary, and there is abundant opportunity for team work. In case two opposing players thrust their sticks through the ring, so that it cannot be advanced in either direction, it is said to be held and is faced off again at that point in a manner similar to that in which a held ball is placed in

play in basket ball.

In case the ring is played out of bounds it is played back by the player who reaches it first unless it goes into an unplayable position or is held by two players, in which case it is faced off at the point where it went out of bounds.

Secretary James E. Sullivan of the Amateur Athletic union has seen the game played and expressed the opinion that it is an excellent game, which needs only to become known to become popular.

Didn't Like the New Way

When civilization reached Pine Hill City, a bank was established, and one of the first customers was old man Johnson. A few days later he wanted money and entered the place with a gun in his hand.

"Want some money today?" queried the president. "Well, it's ready for you."

"Say, I don't understand," exclaimed the old man as he backed off. "I'm here to hold this bank up for \$30."

"But you don't have to. Just sign this check, and I'll hand over your money."

"And I don't yell or shoot?"

"No."

"And the sheriff don't come after me?"

"No. Put your name to this."

"I can't do it—can't do it, now," said the old man, with a choke in his voice. "If that's the new way of doing things, I'm out of it. I want my money, but I want it in the old way."

"Well, have it in the old way, then."

The old man tramped forward to the cashier's window, rested the muzzle of his gun on the ledge and yelled out:

"Come down or you are a dead man!"

"Certainly. Here's thirty."

"And—and is that all there is to it?"

"That's all."

"Then I'll be hanged if I want it," he said, and he threw the money back and went outdoors and sat down on a barrel of sugar in front of a grocery and shed tears.

Naturally.

As a gentleman was stepping from his carriage in Harrisburg to take the train for Philadelphia his coachman said, "The oats are getting low, sir."

"Very well," said the gentleman. "You telephone Miller & Jones to send up some."

Mike went to the telephone, when the following conversation took place: "Is this Miller & Jones?"

"Yes."

"Well, you send up six bags of oats, and hurry up with 'em."

"All right. Who are they for?"

"Arrah, now, don't you get gay—for the horses, to be sure." And Mike rang off.—Philadelphia Ledger

A Hot Prophecy.

Herbert—Did you get what you wanted yesterday?

Horatio—Didn't even get what I deserved.

Herbert—You'll hardly get that in this world, you know. I should think you'd want to slave it off as long as possible.—Boston Transcript

Excursion Notices.

Cheap rates to the West and Southwest—If you contemplate going to Missouri, Kansas, Colorado, Arkansas, Texas, Louisiana, Indiana or Oklahoma Territories or New Mexico, it would be to your interest to communicate with Mr. A. A. Gallagher, D. P. A., Missouri Pacific railway, 419 Walnut street, Cincinnati, O., as that company has authorized exceedingly low one-way rates to designated country; tickets to be on sale first and third Tuesday in January, February, March and April, 1903. Maps and printed information free. eod-11

COLORED TICKETS—To West and Northwest via Pennsylvania Lines.

From February 15th to April 30th inclusive, one way second class colonist tickets to California, North Pacific Coast points, Montana and Idaho, will be sold at low fares via Pennsylvania Lines. For particulars apply to nearest ticket agent of the Pennsylvania Lines.

Unusual low one way rates via Missouri Pacific Railway and Iron Mountain route to Montana, Idaho, Oregon, Wyoming, California, New Mexico, Arizona, Utah, Nevada and Washington. Tickets on sale February 15th to April 30th inclusive. Through Pullman tourist sleeping cars from St. Louis and free reclining chair cars. A. A. Gallagher, D. P. A., 419 Walnut street, Cincinnati, O.

The Guide Post that Stands at the Forks of the Road and Point, the Way to Health is the

Dr. A. W. Chase Nerve Pills

ANERVE TONIC NEVER EQUALLED

THIS SHAPED BOX—NO OTHER

Mrs. William Spencer of No. 105 Granger St., Syracuse, N. Y., says: "I was always nervous, but of late years I could not sleep, was intensely nervous, ringing sounds in the ears and sharp noises in my head at night. My strength was away down and I was very dizzy and had to catch hold of something until it passed off. This condition certainly needed attention as it was growing steadily worse. Dr.

A. W. Chase's Nerve Pills were called to my attention and I got a box. The results were splendid—the nerves became quiet—the noises and ringing in the head, together with the dizzy spells, disappeared completely and I began to sleep well again. The general strength came back and as a result I feel very well every day again. I am only too pleased to be able to say this.

Mrs. Randolph Knutti of No. 59 Penn St., Salem, Ohio, says: "Day times I was always nervous—children's noises and little things upset and worried me. As a consequence I felt depressed and debilitated. I was told of Dr. A. W. Chase's Nerve Pills and got some and they acted finely. They made my nerves steady and strong and gave a splendid feeling of general strength and vigor. I don't worry or bother now about small things any more, and am very grateful for the change. As a nerve and general tonic I consider the medicine has no equal."

BEWARE OF IMITATIONS—Signature and Portrait of Dr. A. W. Chase on each box of the genuine. For sale by dealers, 50c a box, or Dr. A. W. Chase Medicine Co., 257 Washington St., Buffalo, N. Y.

MORGAN CENTER.

Born, to Mr. and Mrs. Howard Fry last Sunday evening, a son.

A son was born to Mr. and Mrs. Jackson Woodruff Monday morning.

Mr. and Mrs. Hugh Bell entertained about twenty-five of their friends last Thursday evening. The evening was spent in a social manner. Refreshments were served.

Misses Gillie Arrington and Eva Clutter spent last Friday with Mrs. Daisy Arrington.

Several from here attended the sale at the home of Mrs. Hugh Harrison at Utica Friday.

John Popham spent last week with his partner near Louisville.

Everett Furley and family have moved in the house vacated by Wm. Gist.

Miss Bessie Cooksey spent Sunday with Miss Eva Clutter.

Pearl Wiggins was the guest of his cousin Jay Clutter Sunday and Monday.

Mr. and Mrs. James Beckholt entertained a number of young folks on Wednesday evening in honor of the twenty-first anniversary of their son Harry.

Ward Bell led the B. Y. P. U. Sunday evening.

A son was born to Mr. and Mrs. William Woodruff Sunday.

Mr. and Mrs. Austin Hays and Mr. and Mrs. Guy Earlywine spent Sunday at the home of John Arrington's, Sr.

David Emswiler and wife of Homer were the guests of Joseph Harrington Sunday.

Elmer Mossholder of Louisville passed through here Monday.

Mr. and Mrs. Reuben McCollough and daughter visited at the home of Howard Fry Sunday.

If you are 15 or under, you may win the first cash prize in the Advocate's rebus contest which begins today. See page 8.

BROUGHT ON A STRETCHER.

Columbus, O., Feb. 25.—Robert Green was brought into the penitentiary on a stretcher. He is to serve five years for a burglary committed at Mt. Vernon. Green was shot by an officer nearly a month ago. The penitentiary physicians believe they will have to amputate his leg. Judge Corneil came to the man's condition held court in jail and Green pleaded guilty.

The new cruiser Baltimore will be the first warship to be fitted with steel armor.

A Danbury man has made a compressed air engine which is half an inch high and no larger than a dime, but it runs as long as the air is applied.

The boys and girls are deeply interested in the Advocate rebus publication of which began yesterday. Don't miss the one on page 8 today.

Towns Near Newark.

WEDDING A SECRET.

Morgan Center, Feb. 25.—Ray Clutter and Miss Belle Elliott were married at the home of Rev. C. A. Gardner on February 5, but for an unknown reason the wedding was kept a secret until the present time. Mr. and Mrs. Clutter have not decided yet where they will make their home.

MURDER TRIAL BEGINS.

Somerset, O., Feb. 25.—The trial of George Worthington of Shawnee, who recently killed his brother, will commence in the court of common pleas at New Lexington today.

HOMER GAS NOTES.

Homer, O., Feb. 25.—The rig-builders tore down the rig at the Speelman well Monday. It will be moved to the farm owned by Misses Mary and Hattie Dunlap, three miles southeast of town, where the Logan company has a large acreage.

Driller John McCoy and wife of Findlay, came to Homer Saturday. He is helping drill on the Hunter well. They are progressing nicely at this well, having in all the drive pipe.

A COLONIAL BALL.

Zanesville, O., Feb. 25.—The colonial ball given in Gold and Choral halls Tuesday evening for the benefit of the city hospital was a decided success, socially, financially and artistically. The ladies most prominently identified with the success of the function were attired in costumes patterned after those in vogue over 100 years ago and with their powdered hair and Ja'ce Meredith curls presented a handsome and charming appearance. Mrs. Frank Walker, formerly of Newark, was on the committee of arrangements.

SCARLET FEVER AT K. M. A.
Gambier, O., Feb. 25.—At eleven o'clock on Monday morning Kenyon Military Academy was again placed under quarantine by the order of the board of health of this village. Scarlet fever has again broken out at the academy, but this time there is only one case and that is said to be mild. The patient is being given the best of care and it is hoped that the disease will be prevented from spreading.

BUCKEYE LAKE.

Miss Faye M. Finkle after a week's visit with friends in Columbus returned home Sunday.

Mrs. James Willoughby of Outville, is visiting J. H. Myer and family this week.

A. R. Neel is quite sick at his home with grip.

Mrs. Stover of Newark is spending the week with L. H. Bounds and family.

Quite a number of our people are attending the series of meetings now in progress at the Disciple church in Hebron.

Mrs. Alice McFarland of Hebron is spending this week with A. R. Neel and family.

Since the snow drifts have been taken off the road Capt. J. T. Millhouse can make his regular trip with the mail.

CROTON.

Born, to Mr. and Mrs. Elmer Myers Monday, a boy.

David Condit and family left Monday for their new home in Lancaster.

Mrs. Lida Miller who has been with her husband at Magnetic Springs the past two months, is home for a short time.

Mr. C. W. Young returned from Newark Saturday evening where he had been for a week visiting relatives and friends.

Mr. Wm. Dobbyn a retired merchant of this place, sustained a slight stroke of paralysis Friday and since that time has been in a very feeble condition.

Mr. Amos Harris is reported on the sick list this week.

At the meeting of the special school board Friday evening, Miss Adkins of Granville was employed as supply teacher the remainder of the year, beginning next Monday.

Mrs. Harry Miller is very sick at this writing.

Frank Graves of Columbus is visiting his parents this week.

C. O. Coleman was in Columbus on business Monday.

Postmaster Stadden who has been in poor health for some time, went to Columbus Saturday to remain a while and take medical treatment. His friends wish for him a speedy recovery.

There are now over 700 lady university graduates in Ireland.

BUCKEYE LAKE DUCKS.

Buckeye Lake, O., Feb. 25.—The water fowl that semi-annually visit Buckeye Lake came in quite large numbers but the last blizzard has compelled them to seek warmer clime. They will return about the middle of March if the weather will not be too cold, according to the reports of our veteran sportsmen.

GIRLS WERE PRETTY.

Croton, O., Feb. 25.—The Christian Endeavor Society gave a Martha Washington supper at the Town Hall Saturday evening which was a success, both socially and financially, the proceeds being \$12.75. The girls that served the tables looked very pretty attired in costumes suitable for the occasion. Each one present received a little hatchet, ornamented with ribbon, as a souvenir.

PROPERTY CHANGE.

Frazesburg, Feb. 25.—A deed has been consummated whereby Joe Martin and Son became the owners of the eight-room house belonging to Mrs. Sherman and her daughter. The property is situated on First street. Consideration \$1100 Mrs. Sherman expects to move to Trinway April 1st, and Martin and son will move into the property now occupied by her. Frazesburg people will be sorry to see Mrs. Sherman leave town as she is one of the old residents of this place.

A DIVORCE WANTED.

Mt. Vernon, O., Feb. 25.—Mrs. Mary A. Frizzell wants a divorce from Reason W. Frizzell whom she married in 1877. The grounds are neglect and infidelity.

LOCAL OPTION RACE.

Mt. Vernon, O., Feb. 25.—The local option election has been set for Tuesday, March 10, and the wet and dry race is on.

KNOX COUNTY DEATH.

Mt. Vernon, O., Feb. 25.—Jno. Walker, 81, who died near Howard, this county, was buried this morning, services being held at Jelloway church.

SUMMIT STATION.

Mrs. Alma McIntosh and daughters, Anna and Helen, Miss Kittie Boner, and Mrs. Emma Fadely, all of Newark, spent Sunday with relatives here.

Frank Morrison and family spent Sunday with M. G. Beem and family. Mrs. J. D. Holcomb is on the sick list.

W. T. King and family spent Saturday and Sunday with relatives here. Prof. O. A. Rusler has accepted a position as telegraph operator at Big Walnut. Mr. Rusler expects to move his family there as soon as he can find a house.

The indications are that we will soon have an electric railway connecting us with Pataskala, Granville and Newark.

The usual amount of moving will be done here this spring.

Mr. H. Buckingham has moved his family into the Smithers property.

Attorney T. B. Fulton of Newark was here on business on Monday.

T. B. Myers of Logan, O., spent Sunday with his mother and brothers here.

George Scott of Columbus, spent Sunday with his parents here.

Master Howard Harper of Columbus, spent Sunday and Monday with his parents here.

Mr. and Mrs. James Kennedy entertained a party of young people at their home on Friday night with the phonograph. All were delighted with the selections.

Mr. William Cashdollar has moved his family into the L. J. Feasel property.

Miss Clara M. Peek of Newark, Sunday with her parents, Mr. and Mrs. Philip Krumm and family, south of town.

Marley Emswiler of Newark, spent Sunday with his family here.

Ninety-five per cent of mortgages, as shown by the census, are made in order to increase the original holding of property or to raise money for business operation and but 5 per cent are because of threatened disaster.

The great majority of dyspepsia is due to hurried eating and eating improper food. It is more effective to eat more than just before and after meals, and to eat more than just before and after meals, and to eat more than just before and after meals.

Small size 20 cents, large size \$1.00.

JUDGE GLANGY HIS FIRST PATIENT

Of Hornellsville, N.Y., Hands Down an Important Decision.

Judge James H. Clancy of Hornellsville, N. Y., and one of the most prominent members of the bar in that historic town, decided recently that as against Blood and Liver trouble, Dr. David Kennedy's Favorite Remedy was worthy of the highest praise. He says:

"I have used Dr. David Kennedy's Favorite Remedy and strongly recommend it for its good effect in my case for liver trouble and blood disorder. It built me right up and I improved greatly in health."

Geo. H. Tift of 878 River street, Troy, N. Y., suffered from liver trouble and his blood was all out of order and after using "Favorite Remedy," has this to say:

"For any one suffering from that run down or tired out feeling, caused by blood or liver trouble, Dr. David Kennedy's Favorite Remedy is the best medicine you can buy. I have used it and I know."

The one sure cure for diseases of the kidneys, liver, bladder and blood, rheumatism, dyspepsia and chronic constipation, is Dr. David Kennedy's Favorite Remedy.

It matters not how sick you are, how long you have suffered, or how many physicians have failed to help you, Dr. David Kennedy's Favorite Remedy will cure you if a cure is possible.

It is for sale by all druggists in the New 50 Cent Size and the regular \$1.00 size bottles—less than a cent a dose. Sample bottle—enough for trial, free by mail. Dr. David Kennedy Corporation, Rondout, N. Y.

Dr. David Kennedy's Golden Plasters strengthen muscles, remove pain anywhere. Each trial bottle free at F. D. Hall's and R. W. Smith's drug stores.

ABOUT PEOPLE.

Items Picked Up Here and There Telling of Your Acquaintances Something and Going.

F. E. Cope of Bowerstown is in the city today.

Mrs. Chas. Dowd is visiting in Columbus today.

D. L. Robinson of Utica, was in the city Wednesday.

G. A. Tarts of Columbus, was in the city today for a short time.

D. S. Richards of Shawnee, was in the city on Wednesday.

John Mohlenpah is in Columbus today on business.

Wm. Robinson, a prominent business man of Bellaire, was the guest of H. G. Lipscomb on Tuesday.

Harry Lyons, after a two weeks' visit here with relatives, has returned home.

Misses Florence Daugherty and Elizabeth Scott spent Tuesday in Columbus.

C. L. Reamer, surveyor, was called to the vicinity of Hanover today, to survey a farm.

D. A. Taylor, one of the trustees of Union township, was in the city on Wednesday.

Hon. Samuel Nicholas a prominent attorney of Coshocton, was in the city on Tuesday on business.

Messrs. Carl Tufford, Grant Emerson and Mrs. Wilgus of New Comerstown, were the guests of E. B. Rogers, 31 Webb street, on Tuesday.

Mrs. Mary Swartz of Stark county, arrived here today, and will make her home with her son, Judge J. M. Swartz in Granville.

Everybody was interested in yesterday's rebus. All will be interested in tonight's picture on page 8. Read the conditions of the contest for cash prizes. It costs nothing to enter the contest.

Mrs. Mary Storiz, who has been visiting her daughter, Mrs. Frank E. Carrico, has gone to Columbus for a short visit with her son, after which she will return home to Circleville, Ohio.

Mrs. Jacob Geyer and two children of Patterson, N. J., who have been visiting at the home of Rev. A. Berger for some days, left for their home on Tuesday night.

Mr. Erasmus Emswiler of Homer, the former popular Court Bailiff, was the guest of Sheriff W. H. Anderson, Jr. on Tuesday night, and attended the Elks banquet.

Prof. Charles C. Rusk, a former well known Licking county school examiner and superintendent of schools at Pataskala and other points in this county, has located in Columbus, where he is engaged in the real estate business.

Mr. and Mrs. A. R. Webb of Pataskala, Ky. Mr. and Mrs. Gideon Wilson of Cincinnati, Mr. Charles Webb, Mr. and Mrs. Samuel Rosebrough and Mr. Mervin of Hebron, and Mrs. Pearl A. of Granville, were here on Tuesday in attendance at the funeral of Mrs. Mary Webb.

Ethel Woodbridge was the belle of the village. The farmers' sons in that region flocked about her at the dances and vied with each other in making her presents. Nevertheless she would listen to none of them when they spoke of love. The reason for this was that Henry Brownell, the son of a retired banker, who lived near her home, had, long before he had a right to think of marriage, asked her to be his wife. Then he had gone east to college and after that had studied medicine in Philadelphia. Henry had written Ethel regularly during his last year at college, irregularly the second year and only occasionally after that. While he attended medical lectures he did not write at all.

Henry had shown fair ability in college, but when he became a student of medicine it was plain that he possessed a remarkable aptitude for that profession. The fame of his great promise spread abroad, and, having relatives in the Quaker City, he became a favorite socially. The girls he had met while in college began to seem very plain people to him compared with the high bred dames of Philadelphia, while his former country sweetheart seemed a very low order of being. A marriage with her seemed out of the question. But what could he do? He must return home for awhile after finishing his medical course and must meet Ethel. Before being graduated he received a very flattering offer to become the assistant of a noted surgeon and wrote his father that he would remain in Philadelphia, entering upon his duties as soon as he had taken his degree.

While he was mingling with the elite of an aristocratic city Ethel remained the same plain country girl, with the same sweet, unpretentious bearing, the same true heart. She was beloved by every one who knew her and would still have been sought in marriage had she consented to listen to proposals. Such girls do not give their hearts and take them back easily. Ethel was much troubled by her lover's treatment, and when he did not return after having been graduated she realized that he had passed beyond her. She neither wrote upbraiding him nor spoke a word to his discredit. She told her parents that Henry was right. His social station had always been above hers, and, now having met the refined people of a great city, she could not hope that he would prefer her to her more refined rivals. Then she burst into a passion of tears and ran away to her room.

From that day she was changed. The color faded from her cheeks, and she grew thin and was troubled with a hacking cough. The village doctor was called, but reported that he could do nothing for her since her malady was occasioned by some mental trouble.

Mr. Brownell, Sr., was an honorable man. He knew of his son's course, but made no comment, intending to wait until Henry had taken his medical degree. When Henry wrote that he expected to settle in Philadelphia, his father sent him a telegram to come home at once. Henry had no choice but to obey or suffer his father's displeasure. From the latter he shrank and reluctantly took a train for home.

It was a spring morning when he reached the station, where he found his father, who had come to drive him over several miles to his home.

"Henry," said the father, "I desire that you begin your medical life right here. After a year of work among your old friends, if you desire it, you shall have my consent to return to the city."

"But I can never advance here," said the son. "The field is too narrow."

"You will have my influence to secure patients."

Henry leaned back in the carriage with a frown.

"To prove that I can help you," continued the father, "I am going to drive you to the house of one who has been failing for a long while. You, a recent graduate, should be far in advance of the fogies about here who have failed to cure the patient, and you will have a good opportunity to show your skill."

There was something in the tone with which his father spoke that Henry did not like, but the enthusiasm of youth stepped in and suggested that, after all, he might show his old friends the country doctors, how little they knew.

Glaning out of the carriage, he saw that they were approaching the Woodbridge farm. He cast a quick side glance at his father, but the elder man wore an imperturbable though serious expression. They turned into the gate and alighted at the door. Henry was led upstairs, a door was thrown open, and there on a bed lay his discarded love.

The windows were open and the odor of flowers was borne into the room by the south wind. A vine climbing about the casement was twisting and turning to thrust its latest sprouts into the chamber. Ethel, in the midst of this revival of life, was unrevived. She lay looking over the fair scene without unresponsive to its freshness and beauty.

"There," said Mr. Brownell to his son, "is your patient. Cure her."

For a moment it seemed to Henry that the past seven years had been obliterated. It was at this season that Ethel had given him his first kiss in the garden below, which was now set free by its perfume. He forgot the 25th of the college town, the high bred dames of the city. Going to the bed, he bent over his patient.

"Ethel, can you forgive me?"

Her reply was to throw her arms and throw them about his neck.

Dr. Brownell in all his long school career never effected a more marvelous cure, though he became a famous surgeon.

JAQUELINE EASTWOOD.

Women as Well as Men Are Made Miserable by Kidney Trouble.

Kidney trouble preys upon the mind, discourages and lessens ambition, beauty, vigor and cheerfulness soon disappear when the kidneys are out of order or diseased.

Kidney trouble has become so prevalent that it is not uncommon for a child to be born afflicted with weak kidneys. If the child un- ages too often, if the urine soaks the flesh or if the child reaches an age when it should be able to control the passage, it is yet afflicted with bed-wetting, depend upon it, the cause of the difficulty is kidney trouble, and the first step should be towards the treatment of these important organs. This unpleasant trouble is due to a diseased condition of the kidneys and bladder and not to a habit as most people suppose.

Women as well as men are made miserable with kidney and bladder trouble, and both need the same great remedy. The mild and the immediate effect of Swamp-Root is soon realized. It is sold by druggists, in fifty-cent and one dollar sizes. You may have a sample bottle by mail free also pamphlet telling of the thousands of testimonials letters received from sufferers cured. In writing Dr. Kilmer & Co., Binghamton, N. Y., be sure and mention this paper.

Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

Dr. R. A. Barrick DENTIST.

For good and reliable dental work, and low prices, call on Dr. R. A. Barrick. He is the cheapest. My work is my reputation. Teeth extracted without pain by Vitalized Air. Plans furnished for Churches, Schools, Business Blocks, Residences, etc. No. 23 1-2 West Main street, Newark, Ohio.

The post-mortem inspections of food animals by the Government in 1902 numbered 38,903,625 and 61,980 carcasses were condemned.

MARCH WEATHER

BLIZZARDS AND HIGH WATER ARE PREDICTED.

Professor Hicks Outlines Atmospheric Conditions That Are to Prevail During the Month.

Prof. Hicks submits the following weather predictions for the month of March, which begins next Sunday:

First Storm Period Regular—This period will be central on the 4th, extending from the 2nd to the 7th. During this period the moon will be traveling from new to first quarter, and from the equator to greatest declination north. Things to look for: From the 2nd to the 4th, winds will shift to easterly and southerly, attended by change to much warmer. As a rule this part of the storm period brings the brightest and most pleasant overhead weather at this season. The inconvenience and unpleasantness arising from the thaw and slush naturally resulting. About the 4th, storms of rain with spring lightning and thunder will develop in western and southern sections, and during the 5, 6, and 7 these storms will follow up against the bright warm weather in the east, while on the western and northern sides the rain will turn into snow and sleet. Cold winds and fair freezing weather will follow up against the snow and sleet area from the northwest.

Second Storm Period, Reactionary—This second period is central on the 9th and 10th, these days being coincident with the annual maximum of a magnetic and electrical disturbance. Things to look for: The periodic change to warmer, with falling barometer, cloudiness and storms of wind and rain will no doubt recur at this time, and it is problematical as to whether the usual change to rising barometer and colder will follow at this time. Full moon on the equator, the 13th, will tend to avert or prolong storm conditions into the period of which it really forms a part beginning on the 13th.

Third Storm Period Regular—As stated before, full moon on the celestial equator on the 13th will draw the existing disturbances into the storm period central on the 16th. Things to look for: No reader of these forecasts need be overtaken unawares by equinoctial storms and hurricanes, especially in the extreme south, at this period. Rain and thunder storms will visit many interior localities, and a counter storm will come out of the northwest, changing the rain to snow and ice, with possibly one of the biggest blizzards of the season.

Fourth Storm Period Reactionary—This period is central on the 21st and 22nd of March at the exact passing of earth's equator through the sun's center. Things to look for: If the general disturbances outlined for the preceding period should materialize only minor storms and changes will come on and about the 21st and 22nd; but if the weather stands open and bright from about the full moon on the 13th up to about the 20th beware of storms on and touching the 21st and 22nd. A very general and violent time of storm and tempest and change is almost certain between the full and new moon in March, and this time will fall in one or merge into both of the central periods of the month. Snow drifts, blockades and high cold gales from the northwest will be some of the things to encounter during the equinoctial storms.

Fifth Storm Period Regular—A mercury disturbance reaches in from April covering the last storm period in March, this last period being central on the 27th, covering the 25th to 30th. Things to look for: We will name the 27th, 28th and 29th as the central days of a danger period. Among the phenomena probable at this time earthquakes and volcanic disturbances may be enumerated. Violent gulf and ocean cyclones, with phenomenal tides, will be most natural. Thunder storms, high winds and possible tornadoes are among the probabilities for many inland regions, especially in southern and central states. The thawing out of streams and rivers, and the water accumulating from rain and melting ice and snow, will imperil life and property, more especially northward, about this time. Look for a late blizzard of boreal weather out of the northwest, quite cold for the season.

DR. SEWARD

Former Licking County Man, Reads an Exhaustive Paper on Typhoid Fever at Springfield.

Dr. I. E. Seward of Springfield, O., a son of Mr. J. F. Seward of Licking county, read a paper on "The diagnosis and treatment of typhoid fever" before the Clark County Medical society, Monday night. The paper was interesting and called forth general commendation from the physicians who heard it.

Dr. Seward concludes that little progress has been made in the diagnosis of typhoid fever, the bedside diagnosis was as easy fifty years ago as it is now. In fact easier, which is doubtless due to the present unconscious leaning on bacteriology. The peculiar range of the temperature, characteristic eruption, and enlargement of the spleen are the most distinctive symptoms. A typical case ought not be mistaken for any other affection.

The successful treatment of typhoid fever depends upon the general management and diet of the patient. Patients must not be underfed, yet the amount of nourishment given should depend upon the amount assimilated. And yet, Dr. Seward concludes, we are not justified in drawing up a system for the treatment of typhoid fever, and each case will continue to present its peculiar symptoms and complications.

Joshua D. Dodge, who was an associate of Wm. Lloyd Garrison, Wendell Phillips and other leaders of the anti-slavery movement, has just celebrated his ninetieth birthday at Arlington, Mass.

Horses neatly clipped at Stephen's livery barn. Rear Auditorium, 23-6t.

Plymouth Congregational.

There will be an important meeting at Plymouth church tonight, commencing at 7:15. The pastor will deliver a discourse on "Winning Forces." All members and adherents are requested by the pastor to be present.

Sent by mail; stamps taken. NERVITA MEDICAL COMPANY, Corner Clinton and Jackson Streets, Chicago, Illinois. Sold by ALL DRUGGISTS.

GEN. BOOTH

CAPT. CLIFFORD EXPLAINS HIS STATEMENT.

What the Salvation Army General Said Was Twisted Into Another Meaning by Reporter.

The Advocate on Tuesday printed a press telegram under a Boston date quoting Salvation Army General Booth as having said:

"We have in our shelter at this time more than 13,000 criminals, and if the rich do not give us enough funds to carry on our work we will turn loose the 13,000 men and give them addresses of these rich."

Captain Clifford who is at the head of the Newark Salvation Army is personally acquainted with General Booth. In telling of the dispatch to the Advocate today Captain Clifford said:

"I have heard General Booth make use of the expression reported in yesterday's paper and I have not the slightest hesitation in stating that the report is a gross misstatement."

"Having heard Gen. Booth make use of a somewhat similar expression many times, both in this country and in England, I wish to say that the idea conveyed in the report is cruel and misleading. What the General did say was practically as follows: 'I have 13,000 criminals in my shelters today, and if through lack of funds I am unable to continue my work and have to close my doors, and consequently let loose these 13,000 on society, it would be very bad for these rich people.'"

TRADES COUNCIL MEETING.
The regular meeting of the Trades Council will be held Thursday evening at 7:30 o'clock in Labor Hall. A full attendance is desired.

Hohl-Edwards.

Miss Lucile Florence, eldest daughter of Jenken Edwards, deceased, and his wife, Maria, was married at St. Paul's church last evening at 6 o'clock to Mr. John Edward Hohl, Rev. J. C. Schindler officiating. Mr. Hohl is chief clerk in the Stinger jewelry store, and Mrs. Hohl was for several years until quite recently stenographer for the Allison Book company. Both young people are members of St. Paul's Lutheran church and are active workers in the Senior Luther League, Mrs. Hohl being chairlady of the Dorcas committee. They were attended at the ceremony by Miss Alma Jewett and Mr. Homer S. Ingman. The wedding party returned to the home of the bride, No. 19 East street, where an elaborate dinner was served to the immediate friends and families. Many gifts evidenced the affection and esteem in which these deserving young people are held. They will make their temporary home at No. 19 East street.

ELECTRIC CATTLE BATHS

Novel Scientific Project to Cure Live Stock Diseases.

Secretary Wilson's announcement that there has been a new outbreak of the foot and mouth disease in a number of herds south of Boston and Governor Taft's cable dispatch calling attention to the serious losses from rinderpest in the Philippines bring to light a novel scientific project to cure these and similar maladies by subjecting cattle to electric baths, says the Washington correspondent of the New York Tribune. Cows, horses and sheep suffering from any ailment are led or driven into apartments constructed on the plan of the lower section of the locks of a canal. The walls of this cattle bathtub are lined with copper. Wires radiating from an alternating current generator run to portable metal jakes placed over the necks of the animals to be treated. Opposite poles of these wires connect with the copper walls. The cattle bath is then flooded and the electric current turned on.

A small amount of acetic acid is added to the bath to promote the conductivity of currents of low voltage. The electricity passes readily through the animals and thence through the water to the negative electrode in the metal walls. The scientists who have been arranging these experiments are confident that the process will cure many stubborn cattle ailments which are now giving much trouble to the agricultural department in general and more particularly to the bureau of animal industry.

The average depreciation of the thirteen cable stocks because of Marconi's success is 3 per cent.

The South African colonies and islands owned by Germany have no local legislature or even crown councils. Each is ruled by an autocrat appointed by the Emperor.

The fixed capital in agriculture in the United States is four times that in manufactures.

RHEUMATISM

ACUTE AND CHRONIC, MUSCULAR, MERCURIAL, ARTICULAR AND INFLAMMATORY.

Some people have been suffering from Rheumatism so long that they can scarcely remember the time when they were entirely free from an ache or pain, and have long since forgotten the joys of a painless existence. They are at the mercy of every ill wind, and their misery is aggravated by exposure to cold or sudden changes in the temperature. They become walking barometers and most accurate in weather predictions, the increasing pains in muscles and joints foretelling the approaching storm or the coming of bad weather. It is from these constant sufferers that the great army of rheumatic cripples is recruited. Their bodies are worn out by the incessant pains and the joints become so stiffened and bent that they are at last compelled to give up or hobble about on crutches.

Nobody ever outlived Rheumatism; the disease never loosens its grip or leaves of its own accord, but must be driven out by intelligent and persistent treatment through the blood, for Rheumatism of every variety and form is caused by an over acid condition of the blood, and the deposit in muscles, joints and nerves of corrosive poisons and gritty particles, and it is these irritating substances that produce the inflammation, swelling and pains, which last as long as the blood remains in this sour and acid state.

To cure Rheumatism permanently the blood must be purified and invigorated, and no other remedy does this so well or so promptly as S. S. S. It refreshes and restores to the thin acid blood its nourishing and health-sustaining properties. And when strong, rich blood is again circulating through the body the acid poisons and irritating matter are washed out of the muscles and joints, and the pains at once cease and Rheumatism is a thing of the past. S. S. S. is a purely vegetable medicine and does not derange the stomach like the strong mineral remedies, but builds up the general health, increases the appetite and tones up the digestion.

Through our Medical Department the pain-racked, despondent Rheumatic sufferer will receive helpful advice from Physicians of experience and skill without charge. Write us fully about your case.

UNION STAMP.

NEURALGYLINE FOR THE NERVES

is the enemy of all neuralgic and other nerve troubles. Accept no substitutes for it. Neuralgyline does not cure or relieve all diseases. It only RELIEVES PAINS CAUSED BY NEURALGIA AND OTHER NERVOUS TROUBLES. No matter how bad the case is, it must succumb to the all-powerful influence of Neuralgyline. Neuralgyline, by soothing the nerves, restores them to their normal state.

Neuralgyline is absolutely harmless. It is a combination of health giving chemicals. Try a box of it if you are one of the great army of neuralgic sufferers. ONE PELLETT WILL BRING YOU RELIEF WITHIN TWENTY MINUTES. Read what these representative people have to say of Neuralgyline:

I have been a great sufferer from neuralgia. Neuralgyline has effected a permanent cure in my case. Miss E. V. Evans, Saco, Me. I have suffered for over a week with neuralgic pains in the head, unable to sleep and nearly crazed with pain. Thirty minutes after taking one NEURALGYLINE tablet I was completely cured. Mr. J. R. Swan, St. Paul, Minn.

Your suffering can be relieved too! Every first-class druggist in town sells Neuralgyline. Price, 25c. a box. If you find that Neuralgyline is not as represented, money will be cheerfully refunded. Samples free on request.

Notice to the Public

We, the undersigned, Retail Dealers in Groceries and Provisions, will on and after March 2, 1933, cease the giving of Trading Stamps with all purchases. We do not consider it wisdom to offer the public a so-called premium to buy the necessities of life. We prefer to give you better goods at a less price by not having the extra expense of 5 per cent which the Trading Stamps cost the dealer and the consumer who pays for all only gets about 1 per cent of that amount in some second or third class article called Premium. We want to be fair and honest with the public and with each other, and we earnestly request the good citizens of the city and county not to ask for any more Trading Stamps after the above date, and by so doing you will save this middle man's profit of 5 per cent which belongs to you.

The Druggist's Help

When sick you want the best physician, and the best physician requires the aid of the best druggist. Pharmacy is now a more exacting science than it used to be. New discoveries, new remedies and new ideas require the modern druggist to be up to date.

This is a thoroughly modern store. It exemplifies all that is latest and best on the professional side of pharmacy. Those who are careful in their drug buying, who want to feel secure, can find good reason for bringing us their prescriptions.

THE RAILWAYS

AN OPEN MEETING HELD BY THE
FIREMEN.

Speech Making Was Followed by a
Dance Tuesday Evening—Local
and General Items.

Owing to the recent large increase in the freight business on the Baltimore & Ohio railroad, the company has been obliged to employ a large additional number of firemen and other railroad men. In consequence of this fact there was a large class of forty-of, and one that will linger long in Taylor Lodge, No. 175 of the B. O. L. F. The initiation took place on Tuesday afternoon, and in the evening there was an open meeting of firemen and their friends held at their hall on East Main street. Through the kindly courtesy of Mr. James Dennison, road foreman of engines, matters were so arranged by him that the entire class of candidates were permitted to lay off on Tuesday afternoon and evening and join the order, as well as many more firemen as could be spared from the service. The open meeting in the evening was of a social nature, and interesting addresses in regard to the welfare of organized labor and especially of the organization of the Brotherhood of Locomotive Firemen, were delivered by Judge W. A. Irvine, Thomas J. Quinney and J. W. Adams. The wives and daughters of the members of the order were present at the open meeting, which was followed by an enjoyable dance, the music being furnished by the well known orchestra of Fitzgerald and Houston. During the evening a fine banquet was served.

BECAME SUDDENLY ILL.

H. T. Lewis, an extra Baltimore and Ohio fireman, while out on his run on the C. O. division, was taken ill very suddenly Tuesday night, between Norwich and Zanesville. Upon the arrival of the train at Zanesville, an ambulance was summoned and the sick man was removed to the Good Samaritan Hospital. Mr. Lewis is a single man and boards on North Third street, this city.

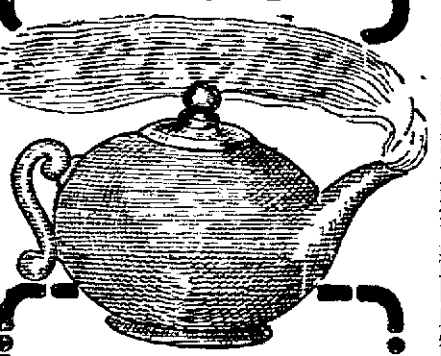

MR. GRAFF IMPROVING.

Charles Graff, the well known clerk in the B. & O. freight office this city, who was badly injured on Monday by being struck by a Pan Handle engine near the Pan Handle freight depot is reported as rapidly recovering from his injuries, although he is still very sore from the bruises received.

LOCAL RAILWAY NOTES.

Fireman J. Dales is laying off on trip for a much needed rest.
Fireman L. Metzgar, who has been on the sick list for some days, has gone to Somerset, where he will visit for a short time.

O. division.

Conductor E. E. Hawkins, who has
been laying off for a few trips, is
again in charge of his caboose.

Fireman Gearhart has returned to
work, after having been off on a short
leave of absence.

Conductor John Miller of the 97-93
run, has been given leave of absence
until March 1st.

A. E. Ward, an employee of the
shops, had the misfortune to injure
one of his feet.

Fireman Briggs has returned to
work after having been off for a few
days.

Brakeman J. R. Elliott, who has
been off for a few days on account
of sickness, has recovered and re-
turned to work on the C. & N. divi-
sion.

Engineer C. H. Helsler, after having
been off for a short time on account
of a severe cold, has returned to
work.

Brakeman E. J. Riffle has recovered
from his recent sickness, and has been
marked up for service on the C. O.
division.

Brakeman M. J. Waters of the C.
O. division, is working again, after a
short leave of absence.

Fireman A. W. Gor is unable for
work on account of sickness.

Brakeman J. T. Ault of the L. E. di-
vision, is confined to his home with
sickness.

James Clugston, a yard man, who
has been unable to work on account
of sickness for some days, has been
marked up for service.

Conductor H. H. McConnell, after
having been off for a few days, has
returned to work.

Brakeman E. H. Wildman of the C.
O. division, is off on leave of absence
for a few days.

fined to his home with a severe at-
tack of grip.

Conductor L. Murrell of the C. O.
division, is working again after hav-
ing been off for a few days.

After having been off on the sick
list for a few days, Fireman J. S.
Riley has returned to work.

Brakeman Edward Jenkins of the C.
O. division, has been marked up for
service after having been off for a
few days.

Wm. Sheffield, an employee of the
shops, who has been off sick for a
short time, has returned to work.

Brakeman J. H. McKee is suffering
with a bad cold, and is off duty in con-
sequence.

Conductor F. F. Funk, who had the
misfortune to be badly injured at
Helper's Switch, a short time ago, is
rapidly recovering from his injuries
and will soon be able for work.

B. G. Shillings, an employee of the
shops, who has been off with sore eyes
for some days, has recovered and has
returned to work.

Brakeman R. E. Leonard has been
marked up for work after a short ab-
sence.

R. E. McCarthy, superintendent of
this division of the Pan Handle, has
issued a circular to trainmen stating
that it has been decided to go back
to the old practice of using the "red
and green light" on cabin cars. In-
stead of the "white light" as required
by the book of rules. Cars will be
equipped as rapidly as they are taken
to the shops for repairs.

The Pan Handle has received a new
engine of the Atlantic type E. 2-A.
from the Shenectady works, and it
will be placed in the passenger ser-
vice on this division of the system.

The genial Pan Handle ticket agent,
E. L. Worth, has recovered from his
recent illness, and is again at his
post of duty.

The Baltimore and Ohio brought
several trains of coal from the Shaw-
nee division Tuesday.

Pan Handle No. 3 had Superintend-
ent Ralph Peters through here on
Tuesday night, en route home to Col-
umbus from the east. Mr. Peters is
superintendent of three divisions.

The Baltimore and Ohio has award-
ed the contract for the building of a
bridge across the Ohio river at Bol-
laire and Bismarck.

President Jorce of the B. & O. is
now in the south on a health recruit-

ing tour, and little will be done with
reference to the expenditures of the
coming year until his return. It is
planned to expend \$10,000,000 during
the year.

B. & O. engine 987 and 1374 had a
big train from Cincinnati on Tuesday.
The Pan Handle company has re-
ceived several new up-to-date cab-
cooses during the past several days.

BATTLE

**Between Strikers and
Officers in Which
Eight are Killed**

(Continued from Page One.)

This afternoon it is known that sev-
en rioters were killed instead of 10.

It was a pitched battle each side being
well armed, firing volley after volley.

Beside the killed, several were fatally
and a score or more seriously injured.

The sheriff's posse and U. S. Marshal
finally won the victory. When the
posse surrounded the rioters and de-
manded their surrender, the fighting
began. One of the posse, a negro,
was the first man killed. Howard
Smith who was of the posse was shot
through the left arm. He killed the
man who shot him. The names of the
dead cannot be learned, as the tele-
phone service is bad. One hundred
and twenty-five rioters were finally ar-
rested and will be arraigned this after-
noon.

Later this afternoon the death list
was known to be eight, seven of whom
were rioters.

Washington, Feb. 25.—In the Senate
today the statehood rider on the agri-
cultural appropriation bill was with-
drawn and the bill relieved of its
burden was passed.

The largest three locomotive works
of Great Britain have just formed a
trust.

Two-thirds of the world's corres-
pondence is conducted in the English
language.

THINK IT OVER.

Something You Can See in Any Res-
taurant or Cafe.

A physician puts the query: Have
you never noticed in any large res-
taurant at lunch or dinner time the
large number of hearty, vigorous old
men at the tables; men whose ages
run from 60 to 80 years; many of
them bald and all perhaps gray, but
none of them feeble and senile.

Perhaps the spectacle is so common
as to have escaped your observation
or comment, but nevertheless it is an
object lesson which means something.

If you will notice what these hearty
old fellows are eating you will ob-
serve that they are not munching
bran crackers nor gingerly picking
their way through a menu card of
new fangled health foods; on the
contrary they seem to prefer a juicy
roast of beef, a properly turned loin
of mutton, and even the deadly broil-
ed lobster is not altogether ignored.

The point of all this is that a vig-
orous old age depends upon good di-
gestion and plenty of wholesome
food and not upon dieting and an
endeavor to live upon bran-crackers.

There is a certain class of food
cranks who seem to believe that
meat, coffee, and many other good
things are rank poisons, but these
cadaverous, sickly looking individuals
are a walking condemnation of their
own theories.

The matter in a nutshell is that if
the stomach secretes the natural di-
gestive juices in sufficient quantity
any wholesome food will be properly
digested; if the stomach does not do
so, and certain foods cause distress
one or two of Stuart's Dyspepsia
Tablets after each meal will remove
all difficulty because they supply just
what every weak stomach lacks, pen-
sin, hydro-chloric acid, diastase and
rux.

Stuart's Dyspepsia Tablets do not
act upon the bowels and in fact are
not strictly a medicine, as they act
almost entirely upon the food eaten,
digesting it thoroughly and thus giv-
ing a much needed rest and giving an ap-
petite for the next meal.

Of people who travel nine out of
ten use Stuart's Dyspepsia Tablets
knowing them to be perfectly safe to
use at any time and also having
found out by experience that they
are a safeguard against indigestion in
any form, and eating as they have to,
at all hours and all kinds of food, the
traveling public for years have pinned
their faith to Stuart's Tablets.

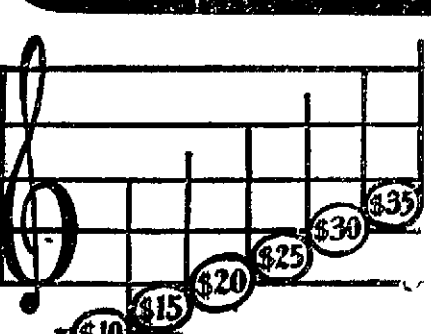

All druggists sell them at 50c for
full sized packages and any druggist
from Maine to California, if his opin-
ion were asked, will say that Stuart's
Dyspepsia Tablets is the most popular
and successful remedy for any stom-
ach trouble.

Uncle Sam's Big Game Preserves

(Special Correspondence.)

Lander, Wyo., Feb. 24.—At least in point of area, Uncle Sam has the largest zoo in the world, though there are others into which are huddled a greater variety of animal life. This is the Yellowstone National park, embracing 3,000 square miles, where roam at will uncounted herds of wild animals indigenous to the country—buffalo, elk, deer, antelope and the like.

The Yellowstone park is an ideal and unique big game preserve, and as there is no open season here the animals are safe from the huntsman, becoming absolutely fearless of injury from man. Although they are as wild as the wildest mountain forest can produce, every species knows to a nicety the boundary of the preserve and keeps within it. Even the timid deer have lost their sense of fear and the noise of a discharging gun has no terror for them. It is not an unusual thing to see a group of them grazing within a few rods of a posthouse or hotel, apparently satisfied that no harm can come to them under Uncle Sam's protecting care. The firing of the sundown gun—a twelve pounder—will not cause them to stop munching the bunch grass which they have kicked up under the snow. But the hauling down of the flag will attract their curious attention much more than the noise of the gun.

The park is patrolled thoroughly by the government to prevent the shooting of the animals. Two troops of cavalry are divided into single scouts and patrol the 3,000 square miles of the park constantly, and as the years go by and this plan is continued the game comes to know and not to fear its human protectors. Poachers receive fair trial before a United States judge, but if it appears that they are on the reservation for the purpose of destroying the game they are dealt with in accordance with the severe laws provided.

Public sentiment among the residents surrounding the park has been awakened, and their sympathies, which at first seemed not to be favorable to the plan of game preservation, have now become thoroughly in harmony with the intent of the government.

Under these wise provisions the numbers of each species have greatly increased until now the park is full

The SPORTING WORLD

Fourier's New Racing Auto.

In his new 120 horsepower Mors racing car, constructed in the shape of a boat, with one seat on the rear axle, Henry Fourier, the most daring perhaps of the world's chauffeurs, expects to travel a single mile in thirty seconds and to go for an hour or a day at the same rate.

Fourier will fly over the road at the rate of 100 miles in an hour. He will go from Paris to Bordeaux in only a little over three hours. Crouched low upon his machine, well hidden from the wind, this daredevil of the road will fly like a streak of light from start to finish. In 1901 the international cup race was run to Bordeaux, and the course was covered by Fourier, who won the contest, in 6h. 11m. 44s., an average

HENRY FOURIER.

speed of about fifty-three miles an hour. It is believed that that terrific feat will be doubled this year.

Fourier recently gave the first reliable information which has been received in this country regarding the course for the international race. He said:

"The Paris-Madrid course has been decided upon for the contest as far as Bordeaux, 327½ miles in all. I have been nominated to represent France and will probably have as mates the Farman brothers, Rene de Kniff, who was in the race last year, and Charron, who won it the first year, will not take part this season.

"I will use my 120 horsepower boat shaped vehicle, weighing less than the one ton limit, and will continue on to Madrid in the main race. I will ride a mile in forty seconds in this race."

Hockey For Athletic Girls.

Two generations ago the solemn daily walk, in double file, represented the whole of the outdoor exercise permitted to the pupils of the fashionable "seminary for young ladies." The very utmost to which a girl could aspire then, when she came "out," was archery.

But all that has been changed. Lawn tennis, golf, bicycling and hockey have successively insinuated themselves into the young woman's curriculum, with effects which are strikingly apparent in the stature, complexion and nervous stability of the rising generation of girls.

The last game to be admitted within the pale has been hockey. This is in many ways a great advance upon any previous concession, especially from the point of view of influence upon character. Tennis, golf and cycling are purely individual amusements, in which the girl primarily has to consider her own interests. In hockey she is no longer an individual with individual interests, but a member of a side to which all individualism must be subordinated and sacrificed.

Big Summer Meeting.

The Columbus (O.) Driving association, which was given the week of Sept. 21 in the grand circuit, has decided to give a summer meeting July 13 to 17, inclusive, the week preceding the opening of the grand circuit at Detroit.

About \$30,000 will be hung up in stakes and purses. There will be six early closing stakes of \$100 each, three for trotters and three for pacers. There will also be ten purses for pacers and nine for trotters of \$100 each.

Quaker Ball Tossers.

The University of Pennsylvania has adopted its baseball schedule, but it will not be given out until approved by the athletic association. It is almost certain, however, that there will be two games with Yale, two with Harvard and one with Princeton. No successor to Roy Thomas to coach the candidates has been selected.

Detroit Baseball.

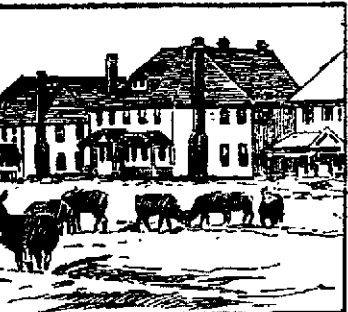

E. G. Barrow, the new manager of the Detroit Baseball club, has been conferring with the owners of the Wolverines regarding plans for the coming campaign. Barrow states that he is after Bruce, the Indian pitcher who was the star of the Toronto nine last year, and that the prospects are bright for securing him.

New Swimming Record.

The hundred yard swimming record was broken at the Brookline (Mass.) Swimming club recently by Harry Le-moine, who covered the distance in the eighty foot tank in 1m. 12.5s. The time is two seconds better than that made a year ago by E. C. Schaeffer of the New York Athletic club.

Boxing in St. Louis.

St. Louis is the home of the feather-weight boxing matches, a week seldom going by without a twenty round affair between a couple of little fellows. The welters tried it recently, and the public was disappointed, so no more big men will be allowed in the ring.

DEER GRAZING IN FRONT OF POSTHOUSE, YELLOWSTONE PARK.

of big game, making it a very paradise for the hunter, if he were only permitted to hunt. However, he can only look on in wonder and with such pleasure as a true sportsman can feel in the passive contemplation of what would be a splendid shot.

In late years black and brown bears have been increasing in numbers and can be seen at any time feeding on the garbage piles at the camp posts and hotels. These bears are perfectly harmless so long as they are kept in a wild state, but when they are fed and petted, as some of them have been in the past, they lose all fear of human beings and are liable to do considerable damage to property and provisions. They are also liable to frighten tourists by following them with the expectation of being fed. Several of the black and brown bears that had been too thoroughly civilized had to be killed last summer because of their sociable instincts.

One of the most interesting experiments which are being conducted in the Yellowstone park at present is the endeavor to raise buffaloes. At the last session of congress \$15,000 was appropriated in a bill for the purpose of providing an inclosure and securing a small herd of buffaloes. This intention on the part of the national legislators has been carried out, the inclosure has been provided and a small herd established within it. The buffaloes are apparently doing well, and as the herd increases they will be given the freedom of the entire park.

In the matter of fishing the policy of the government is less restrictive than in hunting. Trout fishing is allowed in the park, and in the clear lakes and mountain streams much fine sport can be had. That there may be no cessation to this sport it has been recommended that a small fish hatchery shall be established in the park. Seven million black spotted trout were hatched in Yellowstone lake last season.

Yellowstone lake has been aptly designated "the wonderland of the United States" and is year by year attracting tourists in increasing numbers. Congress has begun to realize the worth of this game reservation, and the appropriations which have been made during the past few years have been such as to permit of many improvements to the park which were greatly needed. Much has been done in the way of road building and repairing, and the pleasure and comfort of a trip through the park have been greatly enhanced thereby. The railroads have also begun to show an interest in the park, and the traveling public is to have an easier access than heretofore.

RICHARD J. HAVILAND.

EXTENDING THE CAPITOL

Improvement Proposed For the Building at Washington.

COSTLY CHANGES ARE INVOLVED.

Planned to Spend \$6,000,000 on Extension of East Front and on Office Building For Representatives—New Structure Will Be Low, So as Not to Dwarf Great Dome.

The house of representatives has just made an appropriation of over \$6,000,000 for the enlargement of the capitol at Washington and the construction of an office building for the use of its members, says the New York Tribune. In accordance with the legislative etiquette which is practiced between the senate and house one body never interferes with any appropriation suggested by the other which conduces to its personal convenience. The proposed improvement may be taken, then, as an assured fact. Its accomplishment will require two and a half years. The cost of extending the east front of the capitol will be \$2,500,000. The new office building, which is to be somewhat of a marble palace, is to cost for construction \$3,100,000, to say nothing of another half million for the site. This building is to be just off the capitol grounds, on the south, and is to be connected with the capitol by a tunnel, through which miniature electric cars are to be run to carry members to and from the hall of the house.

The plans presented for the extension are based on the original Walter plans, made when the capitol wings were being constructed—1851 and 1859—and which were approved at the time by President Fillmore. The house and senate will each gain thirty-three rooms by the extension. The exterior construction is to conform exactly to the remainder of the building. While the plan involves the removal of the old portico on the east, it does not involve the removal of the principal walls of that old and historic portion of the capitol. The present front wall of the old building is to remain as the rear wall of an open court, which is to light the west side of the proposed addition. The details of the construction, such as arches and other masonry work, marble and plaster work, are to conform to that of the wings. There is to be a magnificent vestibule 103 feet long, leading direct to the rotunda from the east entrance. It will be an enlarged example of that at the east doors of the senate and house. The rooms on either side are to be like other committee rooms, large and commodious. Ample provision is made for elevators, stairways and corridors, which will connect with the corridors of the north and south wings, as well as for direct communication with the rotunda.

The dome and rotunda are also to receive attention under this plan. For the rotunda the proposition is to restore its interior finish in accordance with the original design. Up to the time the dome was completed the rotunda was of sandstone finish. To restore this, it is believed, will furnish the most handsome effects. When Brumidi began the historical paintings in the frieze the walls were in the original sandstone and his colors were chosen to harmonize. Since that time, although the frieze has never been completed, the walls of the interior have been painted a dull slate color.

Superintendent Elliott Woods, under whose supervision the proposed improvements will be made, recommends cleaning this paint off and treating the stone with oil, to preserve it from the effects of the atmosphere. The floor is to be resurfaced in a shade of amber, which will harmonize with the walls, and the celebrated frieze is to be completed.

The need of the office building is apparent to every one who has business at the house end of the capitol. Members have no place to take their friends and constituents. Many members lease offices in various parts of the city. This plan is not satisfactory, as these private offices are hard for strangers to find and inconveniently located for members. The result is great confusion and dissatisfaction. Every room in the house end of the capitol is utilized as a committee room, and some of these rooms are in the remote interior of the basement, without the slightest outlet to daylight or fresh air. Only the chairman of the committee is supposed to use the room for his own purposes, and consequently only fifty-two members have offices, by virtue of being chairmen of committees, out of the entire membership of 386, which the next congress will have.

The new office building is to be constructed in accordance with the architecture of the capitol and the library of congress. It is to be of marble or granite, three stories in height, with a basement and subbasement, intended at some time to accommodate the heating and ventilating plant for the capitol. The plan selected will give about 100 office rooms on each of the three floors. The basement will be devoted to the document and folding rooms. With the removal of the document and storage quarters from the capitol, together with the boilers and engines, comprising the heating and lighting plants, and the addition of thirty-three rooms by the new central construction, there will be ample quarters for the accommodation of each member of the house in the way of an office room exclusively for himself.

The interior finish of the proposed office building is to be of the finest sort. Each room is to be large, well lighted and heated, with provision for supplying fresh air by forced ventilation. Each room is also to be supplied with a lavatory and hot and cold water.

THE TRAVELS OF COLUMBUS.

A courier is dispatched and overtakes Columbus at the bridge of Pinos and informs Columbus that Isabella has pledged her royal word.

MY OLD KENTUCKY HOME

By Stephen Collins Foster

THE sun shines bright in the old Kentucky home;
This summer, the darkies are gay;
The corn-top's ripe, and the meadow's in the bloom,
While the birds make music all the day.
The young folks roll on the little cabin floor,
All merry, all happy and bright;
By-and-by hard times comes a-knocking at the door—
Then my old Kentucky home, good night!

Weep no more, my lady:

O, weep no more to-day!

We will sing one song for the old Kentucky home,
For the old Kentucky home, far away.

They hunt no more for the possum and the coon,

On the meadow, the hill, and the shore;

They sing no more by the glimmer of the moon,
On the bench by the old cabin door.

The day goes by like a shadow o'er the heart,

With sorrow, where all was delight;

The time has come when the darkies have to part—
Then my old Kentucky home, good night!

The head must bow, and the back will have to bend,

Wherever the darkies may go;

A few more days, and the trouble all will end,
In the field where the sugar canes grow.

A few more days for to tote the weary load—
No matter, 'till never be light;

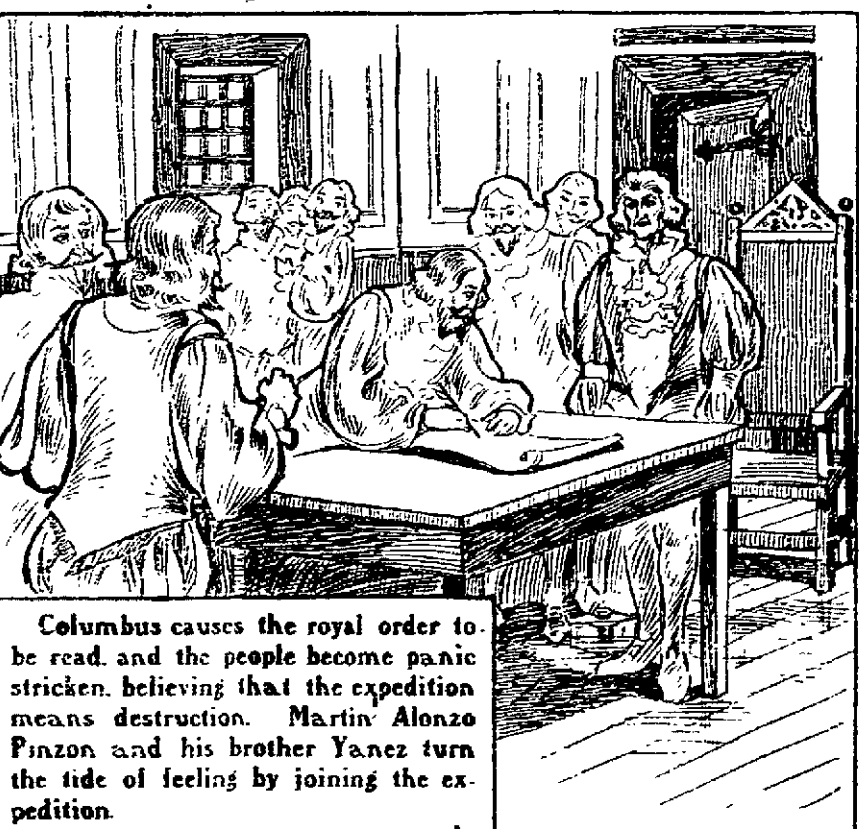

A few more days till we totter on the road
Then my old Kentucky home, good night!

Weep no more, my lady:

O, weep no more to-day!

We will sing one song for the old Kentucky home,
For the old Kentucky home, far away.

THE TRAVELS OF COLUMBUS.

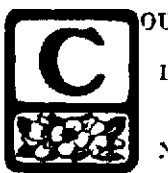

Columbus causes the royal order to be read, and the people become panic-stricken, believing that the expedition means destruction. Martin Alonso Pinzon and his brother Yanez turn the tide of feeling by joining the expedition.

DOUGLAS, DOUGLAS, TENDER AND TRUE

By Dinah Maria Muloch Craik

OULD ye come back to me, Douglas, Douglas,
In the old likeness that I knew,
I would be so faithful, so loving, Douglas,
Douglas, Douglas, tender and true.

Never a scornful word should grieve ye,

And smile on ye sweet as the angels do—

Sweet as your smile on me shone ever,
Douglas, Douglas, tender and true.

O to call back the days that are not

My eyes were blind, your words were few.

Do you love the truth now up in heaven,
Douglas, Douglas, tender and true?

I never was worthy of you, Douglas,

Not half worthy the like of you.

Now, all you beside seem to me like shadows—
I love ye, Douglas, tender and true.

Stretch ye your hand to me, Douglas, Douglas,

Drop ye down from heaven like dew.

As I lay my heart on your dead heart, Douglas,
Douglas, Douglas, tender and true.

NOVELTIES ON BRIDGES

Pleasure Palaces Proposed For East River Structures.

FAIRYLAND SCENES AT NIGHT.

Plans For Blackwells Island, Williamsburg and No. 3 Bridges at New York Contemplate Music Halls, Concerts and Midways—A Most Novel Promenade Suggested.

New plans for the Blackwells island bridge and for bridge No. 3 in New York city recently announced contemplate not only beautiful structures in point of architecture but also places of amusement, says the New York American. The changed plans for bridge No. 3 have been agreed on and now await the action of the art commission. They have been so universally commended that suggestions of plans for similar improvements on the Blackwells island bridge have been made, and they are likely to receive favorable consideration in the very near future. The approaches and the general features of the work of the Blackwells island bridge permit the addition of the attractive improvements. The location of the bridge, with its magnificent view of the sound and the various islands, will make it a popular resort.

Besides the promenades and ornamental stairways there will be playgrounds for the children and places for open air concerts. Application for amusement places resembling a midway have been made and will probably be granted. This will be in the nature of an arcade on both the Manhattan and the Queens borough approaches.

Plans for a music hall, which may be open to the breezes in summer and enclosed in winter, are being prepared, and broad platforms, with seats and tables for luncheon parties, are also included.

It is the purpose of New York city to utilize the vast spaces in the new bridges similar to those in the old Brooklyn bridge that are taken up with solid masonry, allowing only small places for storehouses. The open ironwork of the new bridges permits of places of amusement and breathing spots without detracting from the strength or utility of the bridge proper. The Blackwells island bridge will be the resort of the crowded upper east side, as will bridge No. 3 for the lower east side. The Blackwells island bridge, with its proposed pleasure places, will become popular the very day it is thrown open to the public. One great feature of this bridge is that promenaders will be able to take trolley cars at various points without going back to the terminus.

By the suggested plans the Blackwells island bridge will be a sort of continuation of recreation piers in summer and with inclosures a pleasure resort in winter. Commissioner Lindenthal has announced that he expects bridge No. 3 to be ready in three years. The Blackwells island bridge will be completed much earlier.

One of the features of bridge No. 3 will be link bar cables. Instead of straining wires from tower to tower and building the cables in the perilous manner of old bridges bars of nickel steel are clamped together and fastened to the tower. This method of building a cable makes the work of constructing the span across the river quicker by nearly one-third the time required in making the cables of wire. The commissioner hopes to have the span of the Williamsburg bridge completed by April 1. It is expected that when the line of approach to the Williamsburg bridge is finally determined on many of the novel features now intended for the Blackwells island bridge and bridge No. 3 will be included.

Hereafter all bridges contemplated by New York city will have the architectural features that are to transform the Blackwells island bridge and bridge No. 3 from ugly outlines to those of beauty and grace. The outlines of the Blackwells island bridge as planned originally made it look like an ordinary railroad bridge. The artistic beams and braces of the original plan have been replaced by arched beams, making the view from the towers appear like a vaulted archway.

This promenade will be the widest, cleanest and sightliest bridge promenade in the world. If it is determined to establish a moving sidewalk on this bridge, a subject now under consideration, it will be the most novel promenade in the world. Suggestions for resting spots and reflection places along the promenade are under consideration, as well as at the tower promenades. Elevators and stairways at the towers and midway between the approaches and the river are also being considered. The whole matter now lies with the art commission, which will concede everything for public comfort and pleasure, provided there is no interference with the general outlines of the ornamental work of the structure.

New Buttonless Glove For Men.

A new glove for men which is being worn very extensively for outing, evening and business town wear just now is a very heavy red tan cape, says London Fashion. It is hand or saddle styled throughout and has no wrist opening. The wrists are large and can be turned down easily. The glove is pulled on like a mitten and is very comfortable about the wrist.

February.

Go long, Mistah February!
What makes you want to stay?
Don't you be a-makin' a bird
A-singin' you away?

Alphey, I'm in the garden
Jee-an-ah! I'm to grow!
Why don't you go old February,
An' let away your snow?
—Ellen Barker Ford in Lapham's Magazine.

COFFEE COATS.

Jaunty Little Models Made of Brocade and Lace.

The shorter and more frivolous type of tea jacket is now known as a coffee coat, and here the actual coat is quite short in empire form and is completed by plisse frills of chiffon or full bouffes of lace.

The coffee coat of lace or net is lavishly adorned with insertions or incrustations of lace. Sequined passementerie is much used on black lace or net.

Very dainty coffee coats can be made from short lengths of pompadour or brocade silk and tinted lace. The neck is left open in a small V, and a collar of lace or a film arrangement of chiffon and lace encircles the opening. The

COFFEE JACKET OF ECRU LACE.

close fitting top portion of the sleeve is very short and completed by a deep frill of lace or a full Turkish sleeve of plisse net is attached to the silk upper part.

These little coats are generally worn over a plain slip or blouse, and much variation can be arranged by the aid of colored slips, removable chemisettes and smart choux of crepe or chiffon.

The furor for black and white has by no means departed, and some of the smartest demitote blouses are of black lace net or chiffon elaborately trimmed with fessle lace.

The cut shows a coffee jacket of ecru lace.

JUDIC CHOLLET.

THE TREND OF FASHION.

What Is and What Will Be Worn During the Coming Season.

Brocades today are really lovely. They are mostly copied from old French patterns.

Satins are much used for evening gowns, particularly of a rather thick make with a soft finish. Fancy gauzes, too, always make charming and inexpensive frocks. No matter how small a remnant may be, provided it is good,

GOWN OF YELLOW CHIFFON.

it will never come amiss. Lace will be used more than ever, especially on headgear.

Furs will later on give place to wide stoles of marabout and feather trimming of every kind.

Tassels and fringes as trimmings cannot be surpassed, and they lend an air of softness to the most severe costume.

Bodices are becoming more trimmed than ever, but a distinct effect in outline is aimed at. A very wide effect should be given across the shoulders. Skirts are becoming fuller, and so are sleeves.

The little accessories of dress, berthes, adous and rosettes are responsible for the success of more than one gown.

The picture shows a gown of yellow chiffon, outlined here and there by thin lines of sable.

JUDIC CHOLLET.

Nothing in It.
Farmer Harrow—So Bill Perkins had to sell that brindle cow of his?

Farmer Barnes—Yes, sold run like thunder every time she see a railroad train. No use ever expecting to collect damages on that kind of a critter—Juck.
